

# Why DPP Printing

when the Company made a decision to do in- house printing, primarily with the aim of producing stationery for its shipping business. Since its arrival in Colombo in the early sixties, DPP Printing Printing has managed to be the leader in commercial printing. The organization quickly expanded beyond just printing stationery and moved into publication printing for both the private and government sector. The Company also enhanced its product range by starting a packaging business, catering to state- controlled exports of the country's chief commodity, tea . Expansion and diversifications along with a host of different value additions have enabled the organization to offer print and packaging on par with global standards. This, in turn, has paved the way for DPP Printing Printing to earn a reputation as the most technically sound and well- equipped printer in the country . Today, DPP Printing Printing is the preferred printer/ print packaging partner for most leading brands locally and globally. In this DPP Printing Printing turned a rural village into a global village with many world- leading brands patronizing the plant with regular business. With this growth, the Company increased its capacity by over 150% and even today it is the market leader in quality, value additions, and lead times , factors that keep DPP Printing Printing going strong, along with the organization's dynamic logistical systems and willingness to incorporate modern business practices. DPP Printing Printing is the first Carbon Neutral Printer in the region, with LEED Gold certification and ISO 9001: 2015, ISO 14001: 2015, ISO 45001: 2018, SMETA, and FSC standards. The organization has always been committed to sustainable practices and this is exemplified through practices such as harvesting daylight, rooftop solar power generation, harvesting rainwater, and numerous other environmentally conscious initiatives. The organization also caters to many renowned global brands in the USA, UK, and Europe, while simultaneously maintaining its dominance and leadership in the local market .

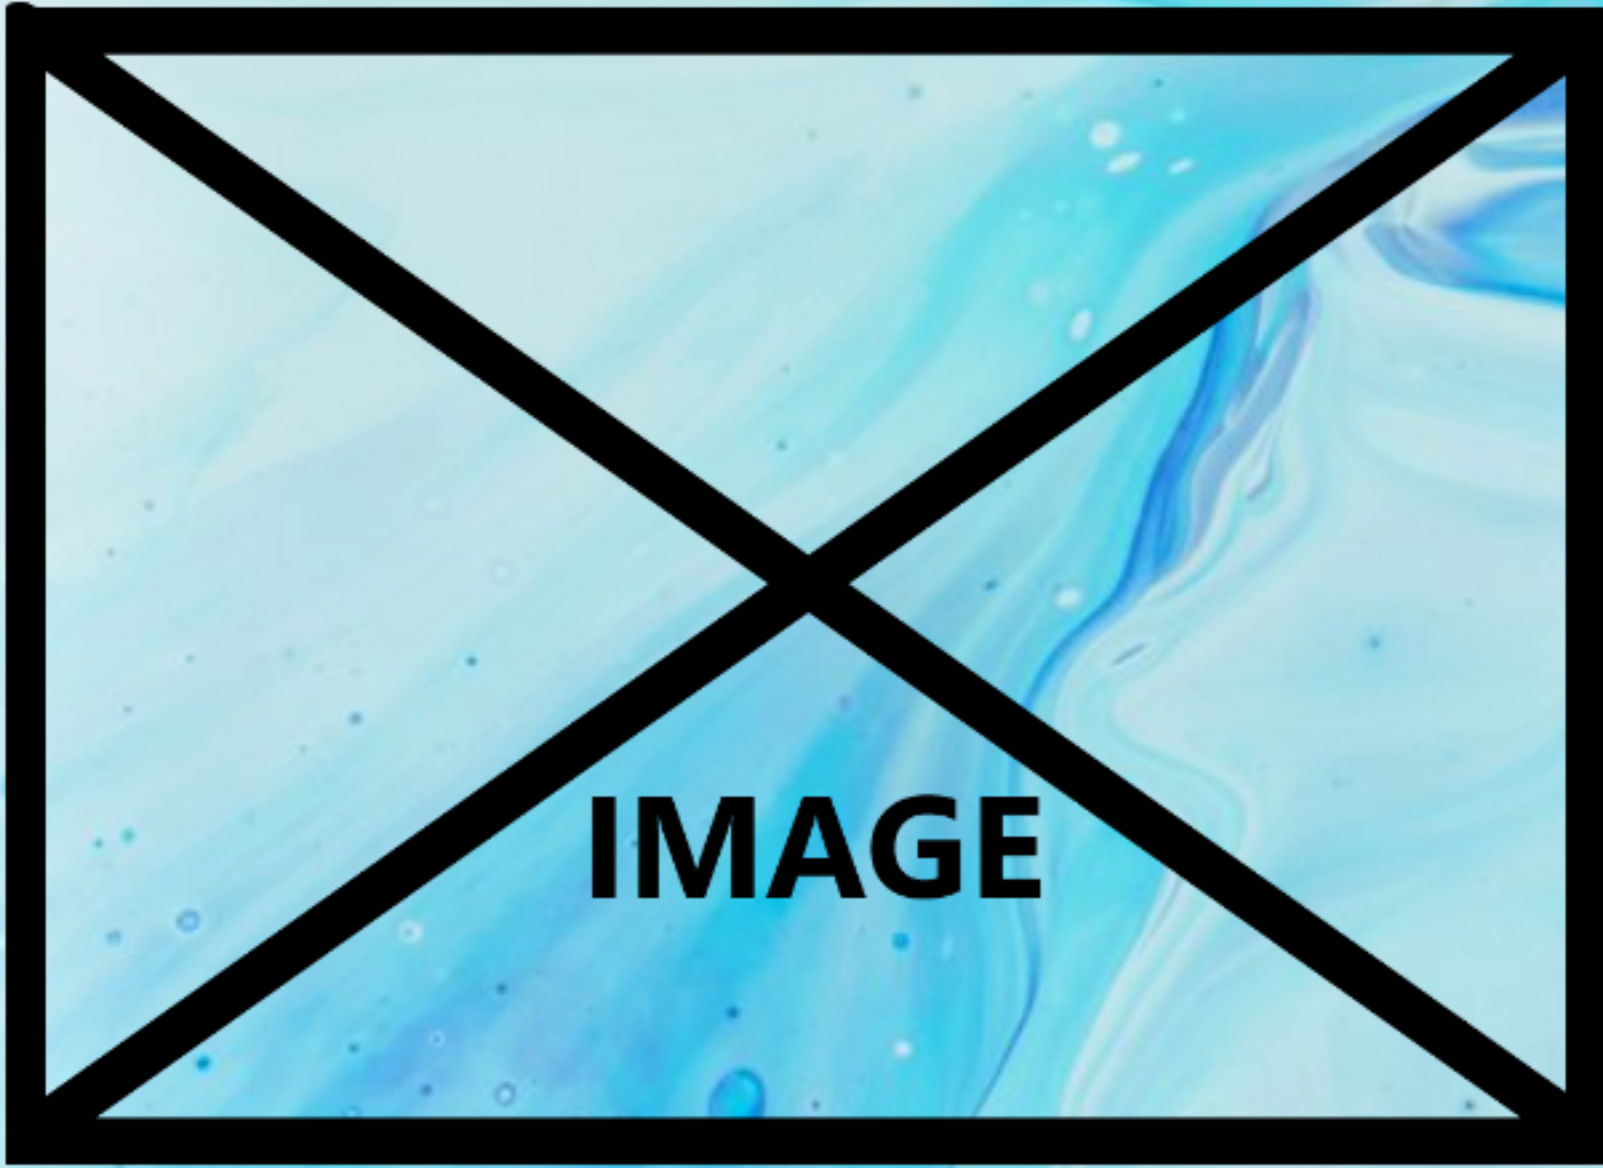

## OUR PEOPLE

The Company employs well- qualified, skilled, and experienced individuals at all levels. Many individuals have gained vast knowledge in all areas of the industry through years of valuable contributions . We believe in building up people, who will in turn help us build our business. This is why we follow an ongoing process linked to the performance appraisal system where we identify the training needs of our workforce and fulfill them. We also focus on increased engagement and welfare for the employees through the organization of annual sporting and leisure events, multi- cultural and religious celebrations, health camps, etc.

### Management

Our management team comprises technically qualified professionals across all functions and processes who have many years of industry experience & exposure ,
